With 230 applications in the Pipeline Toolbox (PLTB), engineers have the tools to solve many of the daily questions that arise in pipeline design, construction, operations and integrity. PLTB, now on the HUB<sup>PL</sup> platform, paves the way for automating integration and analyses to reveal insights into design and operational fitness/status of asset and

infrastructure enabling solutions. The software helps you reduce risk, lower total cost of operations and accelerate project schedules. Hundreds of companies rely on our industry-standard technology to enhance their pipeline engineering performance.

## About Technical Toolboxes

Technical Toolboxes is a leading provider of integrated and cloud-based pipeline software, online resources, and technical training for pipeline engineering professionals around the world. The integrated software products developed by Technical Toolboxes provide engineering software productivity tools for standardization, and we deliver oil and gas industry training courses covering a breadth of topics with industry-recognized instructors.
