

# TRANSFORM YOUR HDD OPERATIONS WITH THE HDD POWERTOOL (HDDPT)

## Struggling with manual HDD calculations and borehole designs?

- Time-consuming and error-prone manual calculations
- Increased risk of project delays and cost overruns
- Difficulty in adapting to unexpected geological challenges
- Inability to verify third party designs

## Meet the HDD PowerTool

### Your solution for streamlined HDD project management and design

- Reduce operational risks and costs
- Save time with automated, precise HDD calculations
- Enhance project accuracy and compliance with industry standards
- GIS integration offers visual mapping for precise planning and real-time adjustments
