

# AC MITIGATION ENTERPRISE PLUS PACKAGE

Combine the AC Mitigation PowerTool with advanced functionality and veteran industry consulting for fast, expert-validated results

AC interference studies on pipelines can be complex for a variety of reasons, including changes in electrical currents, geography, soil resistivity, and much more.

Technical Toolboxes provides the AC Mitigation PowerTool (ACPT), a comprehensive solution to model, map, and mitigate AC induced corrosion-related problems for unlimited segments of buried pipelines running near and parallel to high electrical voltage powerlines.

This powerful software is trusted by some of the world's largest operators and service providers, including many experienced consultants who can help expedite studies and ensure the right decisions are made before, during and after the utilization of the software.

The AC Mitigation Enterprise Plus Package enhances your ACPT license with the Pipeline HUB Enterprise Tier offerings and expert consulting to ensure that your AC interference study measures the right parameters, the software is used correctly, and results are validated for expedited projects and decision making.

## KEY FEATURES

- **Pre-project consulting:** Meet with your consultant to review project parameters and consult on how the ACPT will support the project.
- **Software usage consulting:** Expert guidance on how to use ACPT throughout your study. Our consultants can run their own analysis to compare results if desired.
- **Results interpretation:** Validate results and provide feedback to ensure constructability of design.

## SCOPE OF SERVICES

### Pre-Project Consulting

- Review parameters and consult on how software will support the project
- Advisement on all required data to be gathered, including soil resistivities, pipe to Earth resistances, tower location and load sizing, and geometric considerations
- Consulting is virtual and field data will be gathered by your organization

### Software Consulting

- Expert advice on how to maximize the usage of ACPT
- Consultant can run an independent analysis to compare results
- Guidance on mitigation methods and model outputs

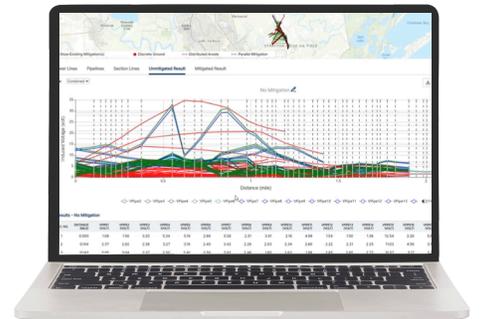

### Results Interpretation

- Step by step expert data validation
- Feedback on designs to ensure constructability
- A recommended strategy based on results will be provided
- There will be no direct work with power companies on the next steps from the consultant

## ENTERPRISE TIER INCLUSIONS

- Premium Pipeline HUB Tools (ESRI GIS Mapping, HUB Navigator, and Report Builder)
- Annual Training HUB Premium Pass subscription
- Advanced login credentials (SSO and MFA)
- Access to flexible (concurrent) licensing
- Platinum customer success & support
- [Learn more](#) about the Enterprise Tier

### PRICING

The AC Mitigation Enterprise Plus Package includes one AC Mitigation PowerTool License on the Pipeline HUB Enterprise Tier and up to 20 hours of expert consulting for \$26,000 per year
